<p>Beschreibung <i>Description</i></p>	<p>Das SEG 1060 ist ein universelles Anzeige-, Überwachungs- und Regelgerät. Das Gerät hat einen Universaleingang mit Anschlussmöglichkeiten für Normsignale (0 ... 20 mA, 4 ... 20 mA, 0 ... 10 V) bzw. Frequenz (TTL und Schaltkontakt). Es bietet Funktionen wie Durchfluss- oder Drehzahlmessung und ist optional mit einem Schalt- und einem Analogausgang ausgestattet.</p>	<p><i>The SEG 1060 is an universal instrument for indicating, monitoring and control. It has an universal signal input for standard signals (0 ... 20 mA, 4 ... 20 mA, 0 ... 10 V) or frequency (TTL or switch contact). The instrument includes functions for measuring flow and rotation and can be optionally equipped with an analog and a relay switching output.</i></p>
