

MINIMESS® Special Series

The Original Minimes® has been leading for decades, yet appears in five new versions now as Minimes® Special Series:

Low Temperature, Offshore, Gas, Defense Line and p/T- testpoint series:

Special Series Offshore

- Resistant against external pressure up to 200bar
- Low temperature range from -40°C
- High corrosion resistance, perfect for the use in salt water

Special Series Gas und Low Temperature

- Stainless steel or brass
- Stainless steel testpoint up to 630 bar
- Separate DVGW approved product line
- Available temperature range from -60°C for oil and gas applications

Special Series Defense Line

- More than 30 years experience in defense technology applications
- Numerous certifications and NATO / MIL supply numbers
- Outstanding technical support to help you realize your defense project

Special Series p/T

- Simultaneous measurement of temperature and pressure
- Combining all advantages of the Original Minimes® testpoint
- Unique engineering for oil or gas applications
